

Coach & Equipment Mfg. Corp. Vehicles Improvements/Corrections

Several improvements/corrections have been made to meet MDOT specifications on small cutaway buses produced under the State of Michigan's extended purchase contract (071B2001344) with Coach & Equipment. This is a direct result of feedback provided by transit agencies and shows just how effective communication can be in holding vendors and manufacturers accountable for their products which ultimately leads to better quality transit vehicles in Michigan.

1. Provide stainless steel doorframes as specified.
2. Required Freedman passenger seats as bid.
3. Required "T" braces for mud flaps to act as an anti-sail feature.
